WEB RESOURCES

With so much information on the web today, how do you know which sites to trust? Here are a few reliable resources.

Lookingyourbest.com ›

The web-based resource for those looking to expand their knowledge of aesthetic surgery and facial rejuvenation.

Breastimplantsafety.org ›

The website was developed by ASAPS and ASPS to provide reliable and trustworthy information about breast implant options, risks and safety.

Healthywomen.org ›

As the national clearinghouse for women's health information, providing access to health information and resources is the primary goal of the National Women's Health Resource Center, Inc. The information provided is comprehensive, objective and supported by an advisory council composed of the nation's leading medical and health experts.

PLAN AHEAD

"INAMED's selection of implant size and shape is a cornerstone to successful outcomes post surgery," says G. Patrick Maxwell, MD. A realistic evaluation of tissue characteristics and your goals help ensure a result that is proportionate to your body type. INAMED offers the BIODIMENSIONAL® preoperative planning system to help the surgeon evaluate these factors and explain to the patient what is realistic for her. "Setting reasonable expectations is one of the most important parts of our consultation process," Dr. Maxwell adds. "We want a result that will make sense for the patient and supports her lifestyle."

"We are not just trying to increase cup size, but to enhance true aesthetic form and beauty." — G. PATRICK MAXWELL, MD
